## Factual Summary

Canada is a BS fraud systemic human rights violating regime. Its failing economy is its own doing. Maybe this is how the bs Canada regime is making up for all the tariff woes it complains about secretly while private swallowing Kash Patel's cock and taking bribes. All of these Canadian motherfucker along with Kash Patel and Pam Bondi need to be on trial in the Netherlands for crimes against he administration of justice which is well within the jurisdiction of this international court. And this bs has been ongoing for years in the USA. Then after filing a Asylum claim against the USA on September 5, 2025, Canada has bee sucking the USA's dick every chance it gets to put some money in their pockets, since all their problems are the USA's tarrifs. See the excerpt below and the full attachment for all the details.

**"1.) Ontario Works has a politically corrupt motive in its interactions and dealings which stem from an Asylum claim against the USA and in particular the Federal Bureau of Investigation ("FBI") and the Central Intelligence Agency ("CIA"). Ontario Works has been doing the bidding of said entities, as part of a criminal cover up to preclude an abuse of power criminal investigation stemming from the false claim that I have a "Disability" which does not exist and never has existed. Such FBI-CIA falsified "Disability" claim has been the impetus for interfering with all of my income generating activities, seeking to force my hand to do as they desire. That should be obvious, right? No money, means everything stops which could be remedied if I simply disappeared to make all of this go away."**

See attachment for more info. And this activity is still ongoing.
